

Choose the Stone

Aim of the game: To choose the correct stone

Set up: Line up 16 stones into two rows with 8 stones in each row. Number the stones 1 to 16

Rules:

- The first player turns around with his back toward the game while the other chooses a stone, but does not remove it
- Once the stone is chosen, the player turns around and tries to guess the stone that the other player has chosen
- He is allowed to ask four times, "Which row is the stone in?" After the other player answers him, he can move the stones around to help him guess the correct answer. After the first answer, the player might move all the odd-numbered stones. The next time he might move around something else to help him work out the answer.

Equipment and Materials: 16 stones (or similar pins)

Age:
8+

Number of players:
2

Duration:
Infinite

Choose the Stone

Let's Inclusivize TSG!

Teaching Style

1. Clearly explain the rules of the game.
2. If necessary you can help the person or people with a handicap to make contact and or move the stones
3. Encourage players to communicate throughout the game
